

**Applications:**

- Plastic Extrusion
- Heat treatment
- Metal

**Main characteristics:**

- Control Panel with integrated HMI
- One programming environment.
- 10.4", 12.1" and 15" color display, resistive touch screen
- horizontal or vertical installation
- IP65 front panel protection level
- wide range of communication ports and protocols

<b>Brief description</b>	Control Panel with display and resistive touch screen

**PROFILE**

The eView LT Control Panel lets you display, set, and manage all of the machine or system automation data. The operator uses a color touch screen. Depending on the model, the screen size can be 10.4", 12.1" and 15", either horizontal or vertical. The use of an Intel ATOM low-consumption processor, plus an extremely efficient design (no fans or moving parts), eliminates all maintenance. The processor can run at either 1 GHz or 1.3 GHz.

The Control Panel has several communication ports (USB, Ethernet, RS232, RS485 and CAN) and different protocols (Ethercat (Master), GDNET (Master), Modbus TCP/IP (Master\Slave), CANopen (Master), Modbus RTU (Master/Slave)). The 2 GB internal mass memory can be expanded with SD cards.

Programming is done with a single development tool: GF\_Project VX, which ensures complete and fast management of application software by means of the five standard IEC61131-3 languages and a powerful graphic editor.

In combination with I/Os, eView LT completes the management and control of process and automation. It manages sequences and work processes, and sets and displays data and connectivity.

In addition, there is a series of specific application templates, user-friendly and easily customizable, for the plastics and heat treatment industries.
