

e431

**Main characteristics:**

- Functional I/O module with 32 channels: 20 digital outputs + 12 temperature inputs
- Powered by rack back-plane
- Single-slot module
- Status LED
- Integrated technology functions: temperature output values in tenth of degree centigrade, internal compensation of cold junction.

| <b>Code</b>          | F071367   |
| <b>Model Number</b>  | e431  |
| <b>Description</b>   | 32 channel digital I/O module<br>20 digital outputs + 12 temperature inputs |
| <b>Position rack</b> | Free from slot 1 to slot 8, 1 slot employment                               |

**PROFILE**

The e431 module manages 20 digital outputs 24 VDC and 12 thermocouple inputs with which you can:

- acquire various data from controlled devices and the environment by means of sensors;
- control and adjust devices by means of different types of signals and commands.

The module installs in the rack and is powered by the back-plane, which connects it to the eCPU400 module.

The front of the module has 2 24-pin connectors for external connections and LEDs for diagnostics of module status and digital outputs.

## TECHNICAL DATA

|                           |  |   |
|---------------------------|--|---|
| <b>POWER SUPPLY</b>       | Internal                               | via backplane   |
|                           | Power dissipation                      | 8 W max   |
